

License Plate Recognition LD-P3019

Zenidea Automatic License Plate Recognition System with LED screen revolutionizes vehicle monitoring and security. Its cutting-edge technology delivers unmatched accuracy and efficiency in capturing license plate information. It seamlessly integrates with existing systems, ensuring swift identification and real-time alerts for parking management, access control, and law enforcement. This allows users to experience fast recognition, customizable solutions, robust security, and scalability. Upgrade your security and efficiency with Zenidea.

Features

- Real-time data visualization
- Video notification of unlicensed vehicle
- Customizable options of display and voice output
- Identify fake license plates
- Camera with detection of target in motion , HD network, strong light suppression, built-in LPR algorithm
- Automatic video detection of vehicle
- Offline charge collection
- Real-time video monitoring and recording

Technical Specifications

Housing Dimension	1345*310*260mm
Body Material	Painted Carbon Steel, Baking Finish, Tempered Glass, Aluminium Alloy
Power Consumption	30W - 50W
Operating Voltage	12V
Input Voltage	220V±10% 50 ~ 60Hz
Operating Temperature	-25℃ ~ +70℃
Adapt To Vehicle Speed	≤35km/h
Housing Thickness	1.5mm
Fill Light	<30lux
Language	English Spanish Russian Japanese Korean Thai Portuguese
Display Screen	Four lines display
Camera Lens	4-12MM
Protection Level	IP65
Capture Distance	4 M
Camera	1/3CMOS 2Mpixel
Record	DATABASE
Management	PARKING SOFTWARE
